# Our Goal

- Develop a gamified system where users can input images of wildlife to work towards achievements and receive scores
- Provide these images to scientific data gathering
- Experiment with AI Image Classification
- Build a fun game for people to play, where they can learn about the wildlife in their area

In Essence: learn as much as possible, have fun, build a fun website for people to interact with

# Demo

# Stack

- HTML
- CSS
- Hugging Face
  - ResNet18
  - PEFT Transformers
- Claude
- Python

**HUGGING FACE**
